

CHARLES EROMOSE

Full Stack Engineer · React · Next.js · Node.js · Express · MongoDB · Django · PostgreSQL · AWS · Figma

Open to Senior Full Stack / Backend Engineer roles · Nigeria, Remote, Europe, or UK

Lagos, Nigeria +234 906 778 4278 ehiameneromosele@gmail.com [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Full Stack Engineer with 5+ years of experience building and scaling production-grade web applications across the MERN stack and Django ecosystems. Proven track record of designing high-performance APIs, reducing database load by up to 90%, and maintaining 99.9% uptime. Strong in system design, authentication architecture, real-time systems, and secure payment integrations. Recently extended backend expertise into API integration and contract validation using PHP (WordPress REST API), working on real-world system mapping, debugging, and alignment across frontend and backend services. Experienced in end-to-end ownership across architecture, development, testing, and deployment.

CORE TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, Tailwind CSS, Framer Motion, GSAP, Figma, CSS3

Backend: Python (Django, DRF), Node.js (Express.js), PHP (WordPress REST API), REST APIs, API Integration & Validation

Database: PostgreSQL, MongoDB, Redis, Query Optimization, Indexing, Migrations

DevOps: Docker, AWS S3 / EC2, CI/CD, Git / GitHub, Fly.io, Vercel, Railway, Netlify

Security: JWT, OAuth 2.0, Multi-step Auth (OTP/MFA), RBAC, Bcrypt, HttpOnly Cookies, CORS / CSRF, Helmet

Methods: Agile / Scrum, System Design, REST Design, Real-time (Socket.io), Code Review, TDD

PROFESSIONAL EXPERIENCE

Feel Nigeria Media Limited • Full Stack Engineer

Jul 2024 – Present | Remote | 5-person team

Stack: Django REST Framework · React · Next.js · PostgreSQL · Docker · AWS S3 · JWT · OAuth 2.0

Tourism and lifestyle platform serving 10,000+ users across Nigeria and the Diaspora — combining destination discovery, local events, dating, and cultural packages with integrated Premium Trust Bank payments.

- Built and scaled Django REST APIs handling 50,000+ daily requests at 99.9% uptime, powering seamless booking, discovery, and payment flows.
- Delivered React/Next.js SSR frontend that cut Time-to-First-Byte by 40% and lifted session duration by 20% across destination and event pages.
- Implemented JWT + OAuth 2.0 RBAC across four user roles — Traveller, Host, Event Organiser, and Admin — securing 10,000+ accounts and payment sessions.

BemaHub Platform • Backend Integration Engineer (Contract)

March 2026 – May 2026

Stack: PHP (WordPress REST API) · MySQL · REST APIs · PayPal · Paystack

- Led API mapping and validation across 50+ endpoints, aligning frontend contracts with backend implementations.
- Traced API usage from frontend services, validating request/response structures and ensuring correct backend routing.
- Validated payment integrations (PayPal, Paystack), including webhook flows and transaction validation

EdSofta Computer Academy • Frontend Engineer

Apr 2022 – May 2024 | Lagos, Nigeria (Hybrid)

Stack: React · Next.js · TypeScript · Tailwind CSS · JavaScript

Tech training institution offering professional software development courses to mid-career professionals.

- Built a fully responsive blogging and learning platform (React + Tailwind CSS) from scratch, growing active readership by 20% within three months of launch.
- Implemented advanced performance optimization — route-level code splitting and lazy loading — reducing average page load time by 30% on 3G mobile connections.
- Mentored 3 junior developers in React best practices, component architecture, and Git workflows — two of whom were promoted within 12 months.

FEATURED PROJECTS

Retsy — Full-Stack E-Commerce Marketplace

[Live Demo](#) | [GitHub](#)

Stack: Next.js · Django · PostgreSQL · Redis · AWS S3 · Paystack · Docker · Celery · JWT · Fly.io

- Engineered a scalable multi-vendor marketplace with modular Django REST architecture (15+ domains), supporting product listings, cart grouping, and seamless checkout flows.
- Optimized performance using Redis caching and query tuning, reducing database load by up to 90% and sustaining sub-200ms response times under 1,000+ concurrent users.
- Built a production-grade Paystack payment system with webhook verification, seller payouts, platform fee computation, and idempotent transaction handling.
- Designed robust data layers combining PostgreSQL (40+ models, indexing, atomic transactions) with Celery + Redis for background workflows and async task processing.
- Deployed on Fly.io with Docker and AWS S3 media storage, implementing JWT auth, CORS / CSRF protection, and environment-based secret management.

Trellify — Full-Stack Trello Clone (MERN Stack)

[Live Demo](#) | [GitHub](#)

Stack: Next.js (TypeScript) · Node.js · Express.js · MongoDB · Socket.io · JWT · Nodemailer · Figma · Vercel

- Engineered a multi-step auth flow — email → password → 6-digit email OTP — with JWT access tokens, HttpOnly refresh token cookies (7/30-day expiry), and Google OAuth 2.0, replicating the security model of a production SaaS.
- Designed all illustrations and mascot characters in Figma, then implemented them as SVGs in Next.js — including an 8-step animated onboarding welcome flow with slick effects, drag-and-drop demos, and step-progress indicators.
- Built a live collaborative Kanban board with Socket.io room-based broadcasts, an Inbox panel, a Planner panel with calendar integration hooks, and a board switcher — all within a single-page layout matching Trello's UI exactly.
- Implemented bcrypt password hashing, express-rate-limit (5 auth attempts / 15 min), CORS, and Mongoose account-lockout logic; on MongoDB Atlas with environment-based secret management.
- Integrated Nodemailer with Gmail SMTP to send branded HTML OTP and password-reset emails (1-hour expiry) deploying frontend on Vercel and backend on MongoDB Atlas with environment-based secret management

Etha — Hospital Management System

[Live Demo](#) | [GitHub](#)

Stack: React (TypeScript) · Django · PostgreSQL · AWS S3 · JWT · Google OAuth 2.0

- Designed a multi-role healthcare platform — Patient, Doctor, Nurse, Lab Scientist, Admin — with strict RBAC enforced at API and database layers with a conflict-aware appointment scheduling system eliminating double bookings across 500+ concurrent simulated requests.
- Implemented JWT + Google OAuth 2.0 authentication with refresh token rotation, ensuring confidentiality of sensitive medical data.

OPEN SOURCE & COMMUNITY

- Participant of the Africa Technology Summit (AfriTech) hosted by Google Africa with Talks involving Software Solutions, solutions to building formidable startups and empowering Next generation talents of software engineers.
- Hacker and participant at Hac/<ing GENAI 5.0 hackathon event hosted by Slack Team being held at Ikeja, Lagos Nigeria.
- Active mentor guiding early-career engineers through backend fundamentals, full-stack MERN development, code review, and Django best practices.

EDUCATION

B.Sc. Computer Science — University of Benin, Edo State, Nigeria

2015 – 2019

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

AWS Certified Developer — Associate (In Progress)

Target Q3 2026

CompTIA Certified Network Engineer (CNE)

2022

CompTIA IT Fundamentals+ (ITF+)

2021
